

AMENDMENTS TO THE SPECIFICATION

Please add the following paragraph below the heading “QUALITY OF SERVICE REQUEST CORRELATION” on page 1.

Background

Please add the following paragraph between the paragraph beginning on line 20 and ending on line 21 of page 2 and the paragraph beginning on line 22 and ending on line 28 of page 2.

Summary

Please add the following paragraph between the paragraph beginning on line 31 and ending on line 33 of page 3 and the paragraph beginning on line 34 and ending on line 34 of page 3.

Brief Description of the Drawings

Please add the following paragraph between the last paragraph on page 3 of the original specification and the first paragraph of page 4.

Description of the Preferred Embodiments

Please replace the first paragraph on page 4 of the original specification with the following paragraph.

Figure 1 shows one example of a data network. A terminal TA wishes to set up a service session with a terminal TB via the data network N. This service session is associated with at least the transmission of one or more data microflows F from the terminal TA. To enable the reservation of resources for each data microflow, a resource reservation request (R₁ or R₂) is transmitted to the control system responsible for managing the data network N.

Please replace the paragraph on page 4 from lines 32 to 34 of the original specification with the following paragraph.

The control system S also comprises control means for actually controlling the network equipments (for example R_A or R_B) concerned (i.e. for reserving the necessary resources).
